A Large & Growing Market – Aged Care & Disability Clients

The influx of ageing baby boomers is driving market growth and putting stress on the aged care industry, creating a needs gap.

Australians over the age of 65¹

2017 **3.8m** ↑ 2030 projected **5.4m**

Australian Government aged care expenditure²

2017-2018 **\$18.1bn** ↑ 2021-22 projected **\$24.0bn**

By 2050, the world's population aged 60+ years³

2015 population **900m** ↑ 2030 population **1.14bn**

Australian Government Disability Funding⁴

2019/20 funding **\$17.8bn** ↑ 2022/23 funding **\$24.7bn**

The Aged Care Crisis - Why IntelliCare is Needed

Most seniors choose to avoid aged care and remain living in their own home as long as possible.

In 10 years

Most economies will have a 20% elderly population, some >33%

Ageing population places a large demand on resources.

\$225 Billion

The increase in the US Home care market by 2024

An overwhelmed system leaving seniors vulnerable and exposed.

34 months

Australian average wait time to receive government support

Affordable solutions are needed now.

\$20 Trillion

Asia Pacific spend on aged between 2015 and 2030

Governments cannot provide aged care services to all seniors.

The Aged Care Crisis – Market Stress

As the population of the elderly increases, the tax base to service them diminishes.

Residential Aged Care in 2020

2018: 41%

51%

Unprofitable homes

2013: (\$0.86)

(\$8.25)

Losses Per Bed Per Day

Home Care in 2020

2015: \$9,726

\$7,951

First 25% **EBITDA per client**

Home Care Market Growth

16,000 people died waiting for a home care package in 2017/18

The current waiting list for homecare packages is well **over 120,000 people**

November 2019, the Morrison government announces **\$537million** across 10,000 packages

Competing Home Monitoring technologies are flawed

Technology

Pendants are often uncharged and not used effectively

CCTV privacy invasion is unacceptable for users

Nurse call systems can be out of reach

Pitfalls

Used post-accident and does not prevent one

Don't encompass wellness or predictive alerts

No integration with other devices / technology

Users don't use their duress alarms

Users were lying on the floor for >1hr

Proprietary, Predictive Artificial Intelligence (AI) solution

Intelicare overcomes the pitfalls of post-event driven home monitoring systems.

Step 1

Smart sensors installed through the home

Open architecture easily integrates with emerging or custom sensors such as wearables, or radar

Step 2

InteliCare learns normal domestic behaviour

Sleep patterns, bathroom use, meal preparation, climate, social activity and household activity

Step 3

Receive daily notifications and actionable insights from the Intelicare app or dashboard

“All okay” daily messages and alerts when there is a change in normal behaviour

Step 4

Increased early incident detection to help reduce liabilities and enable better care

Clinicians & Carers

Remotely monitor deterioration and triage multiple patients

Intelicare - Powered by AI

Industry leading AI systems use Internet of Things (IoT) data to detect changes in activity and behaviour patterns.

Falls protection

Three levels of falls protection ranging from detection to prevention

Failure to Get Out of Bed

Push notification escalates to alert with message and SMS

Daily Update

24 hours push notification all is "normal"

Meals Alerts

Track meals or medication, to monitor malnutrition and illness risks

Social Isolation

Social isolation has a 37% increase in falls risk. In-built warnings help manage this risk.

Domestic and Mobility Activity

24 hours push notification

Key Products - IntelliCare Pro & IntelliLiving

IntelliCare Pro (B2B) Multi Client Interface

- Business-to-Business for residential care
- Monitors multiple locations at once
- Triage dashboard allows priority care
- Staff receive unparalleled wellness and activity insights
- Scalable and customisable
- Advanced reporting and audit trails for accountability

IntelliLiving (B2C) Family-Friendly Interface

- Business-to-Consumer hardware and software
- Supports Do-It-Yourself (DIY) independent living
- Low-cost technology solution to aged care
- Off-the-shelf, easy to purchase and install
- Includes subscription to the IntelliCare app
- Available through care providers government support programs

Value Proposition - Quality Care Outcomes

InteliCare delivers significant industry wide cost savings and efficiencies with additional revenue streams.

Independent Living

- 1 Low cost advanced technology solution
- 2 Defers the burdensome high costs of aged care
- 3 Affords users to age in their own homes

Governments

- 1 Protect vulnerable in COVID-19 isolation
- 2 Reduce transmission pathways
- 3 Reduce Aged Care tax burden

Elderly/Disability Care

- 1 Better care whilst limiting client loss
- 2 Increase productivity
- 3 De-risk operations and improved compliance
- 4 Additional revenue

Hospitals

- 1 Decrease hospital admission and re-admissions
- 2 Reduce days spent in hospitals
- 3 Enable in-home hospitals

Insurers

- 1 Reduce underwriting risk for private health
- 2 Reduced premiums for abled elderly to attract market share

InteliCare & COVID-19

Critical element in a Telehealth digital pathway pandemic response

Relieves stress on the health system and mitigates risk of imposed-isolation when hospitals reach capacity.

Step 1:

Remote Diagnoses and Treatment

Telemedicine based screening for first consult

Teleconsult with GPs and other clinicians

Digital ePrescription from GPs to pharmacies & home delivery

Connect 24/7 patients/GP/carers

Higher Temp

Decreased Meals

Failure to Arise

Lower Activity

Step 2:

Remote Care Triaging

Data driven response based on clear trends

Carers respond to those most in need

Reduces infection pathways from carers doing welfare checks

Removes risk of undiscovered death in quarantine

Revenue Model – Product Sales & SaaS

Competitive product pricing and attractive subscription revenue model

Upfront revenue through direct hardware sales with SaaS recurring revenues through an application supporting growth in following years.

Primary revenue streams

Upfront Revenue – Hardware Sales

SaaS Revenue – Subscription Model

- Fully commercialised with aged care B2B contracts and B2C sales providing lucrative SaaS recurring revenues.
- Very high SaaS margins at scale
- Attractive B2C subscription model combines upfront hardware costs & subscription costs into one competitive monthly rate.
- Consumers can purchase through IntelICare's new e-Commerce platform – available through IntelICare's website.

Go-to-Market Strategy - Multiple Channels

Business-to-Business (B2B)

Aged / Disability Carers

Microsoft Partnership – Co-sell ready and active

InteliCare was selected for Microsoft's ScaleUp program, a global initiative designed to fast-track sales scale

Direct channels opened to Fortune 500 & ASX 200 Companies

InteliCare to receive USD\$250,000 in Azure Credits

Microsoft provides a dedicated sales team with global reach

Opportunity pipeline developed and active

Access to Microsoft tools, resources, connections and big data capabilities.

InteliCare + Microsoft Azure

- Inbuilt level of reliability and security.
- Flexible, secure, enterprise class functions to support integration.
- Ability to integrate a huge range of sensors and devices.

InteliCare + Microsoft Power BI

- Leverage existing investment in Microsoft technology to derive additional value, including integrated reports.

InteliCare + Microsoft Integration

- Integration into existing Microsoft systems.
- Enterprise Agreements with Microsoft for larger clients who wish to own their data .

Roadmap Future Development and Outcomes

ICR Price Performance May '20 IPO - Present

Proven, Experienced Board and Management Team

Greg Leach

Chairman & Co-Founder

Co-Founder and CTO of Empired Ltd (EPD. ASX) for 16 years leading to \$140m+ market cap company on ASX.

- 30 years technology industry experience
- Responsible for multiple value accretive software technology acquisition
- Empired Ltd (EPD:ASX): Co Founder & CTO
- Frontline Services Ltd: Co Founder & Director
- Blockhead Technologies: CEO

Jason Waller

CEO & Managing Director

Former CEO Spookfish (SFI:ASX), acquisition by US company EagleView Technologies for

- \$136 million in 2018.
- Extensive experience in defence, aviation and technology
- Spookfish (SFI:ASX): CEO
- Climb Performance: Director
- Royal Australian Air Force: Commanding Officer

Mike Tappenden

CTO & Co-Founder

Managed programs of work valued up to A\$200 million, project teams of up to 50 people and worked with board-level stakeholders of tier-1 corporates.

- 25 years' technology industry experience
- Empired Ltd (EPD:ASX): BDM & Lead
- Consultant
- Frontline Services Ltd: Director
- Woodside Energy: Technology Architect

Scott Taylor Non-Executive Director

Scott is the founding Partner of Taylor David Lawyers with over 15 years' experience in reconstruction and insolvency law. Scott is a Board Member of the Children's Hospital Foundation Queensland.

Neil Hackett Non-Executive Director

Neil Hackett. Neil has over 20 years of ASX director, company secretary and senior executive experience in mining, industrials and funds management industries and a further 10 years corporate experience with the ASIC.

Branden Dekenah Non-Executive Director

Branden has in excess of 30 years' experience in technology & innovation, as a business founder, consultant and senior executive. Most recently, Branden was co founder and managing director at Conducive, which was sold to Empired Limited in 2012.

Intellicare

Our Ai Opportunity

Industry-leading suite of aged-care products built on our AI platform provides significant competitive advantage.

Scaling Up

Roll-out of comprehensive B2C products and marketing.

Existing Partnerships

B2B opportunity driven by industry demand for efficiencies and better care outcomes.

Post Revenue

Existing revenue underpinned by government funding and age-in-home government policy.

Appendix 1 - Case Study 1: ECHO Community Services

Background

ECHO Community Services provides services to seniors living independently in their own home. ECHO prides itself on providing quality in-home care based on a “MY MUM” approach. In short, if it’s not good enough for my mum (or dad), then it’s not good enough for yours.

To retain clients and provide a higher level of care, ECHO needed a way to better monitor the wellbeing of their clients, give families peace of mind, and reduce the risk of health incidents.

Use of IntelliLiving

ECHO uses IntelliLiving to help people remain independent and reduce the risk of a fall or accident.

Sensors are installed in the person’s home, and the smart system learns their routine and can identify potential risks.

- Failure to get out of bed
- Household climate
- Reduced domestic activities like preparing meals or doing washing
- Social isolation

IntelliLiving runs 24/7 in the background, without the client needing to activate it.

Family members and caregivers can easily access information and ongoing notifications about the person’s wellbeing, activity, and home environment via the IntelliCare app.

The Result

“For people that are isolated, this is a lifeline, this is really important”

- Jonathan Smith, CEO of ECHO Community Services

“Our elderly mother lives at home alone as she prefers the independence this situation provides her. IntelliCare provides me and my family with an insight into Mum’s activities and gives us comfort that she is safe at home.”

- Nick

“I feel protected, I know that my children know that I am ok.”

- Tina

Appendix 2 - Case Study 2: Government Disability Centre

**InteliCare Pro Web App
Dashboard**

Background

A government disability centre provides housing for a up to 10 people who live in a home-like setting. Residents are people with disability who have been accused, but not convicted, of a crime. To ensure the appropriate support was given to vulnerable residents, the facility needed a monitoring system to provide multi-dimensional data.

Use of IntelliCare Pro

The customer installed IntelliCare Pro throughout the entire facility to monitor residents from a distance. Their safety and security requirements meant that IntelliCare needed to integrate with a range of sensors and use AI-powered analysis to provide insights to staff from a safe distance.

The open architecture means IntelliCare can source a new specialist sensor, test it, then add it into the visual dashboard and app. Clients can access emerging technology quickly.

The Result

“These new sensors coupled with the IntelliCare Pro dashboard materially increases the safety of our residents, who are some of the most vulnerable in our community, and our staff.”

- Customer Lead
