

Helping you live safely and independently.

A smart care solution for senior Australians.

Live safely and independently.

InteliCare's smart care solution uses discreet sensors, emergency alerts and wearable devices to help senior Australians stay safe, healthy and independent.

24/7 care.

InteliCare is designed to give you independence and privacy.

Our smart solution uses discreet sensors to learn about you, your routines, **your lifestyle, your quality of sleep and more.** It puts all that information together and, if it notices any changes, it informs your family and care team through the InteliCare app on their phones.

Easy set up. Peace of mind.

Your family or carers can install your InteliCare solution, or installation can be arranged for you. Once it's set up there's nothing else for you to do.

There is no need to program anything and no need for you to carry a smartphone.

Smart care.

If you're OK, InteliCare will send your family or care team daily notifications saying everything's fine.

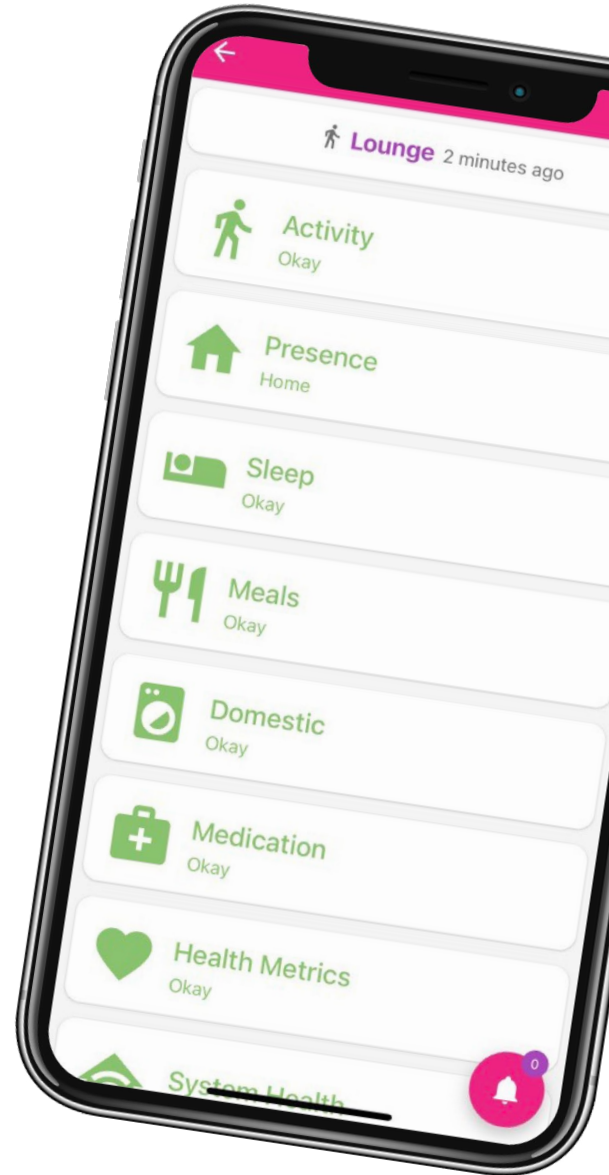

If InteliCare spots a change in your routine, your family and care team will receive an app notification or SMS alert.

Your family and care team can check in anytime via the app, so if they notice anything out of the ordinary they will be able to adapt your care to suit you.

4G emergency response devices.

Australia's 3G network, which is relied on by multiple people for medical and duress devices, will shut down in 2024.

InteliCare's PERS (Personal Emergency Response) devices, which include pendants and emergency alarms, do not use a 3G network. **This means they will continue to work following the 2024 3G shut down.**

Quality of life.
Peace of mind.

How IntelliCare works.

1 Install

Easily install unobtrusive smart sensors in your home

2 Learn

IntelliCare builds an understanding of your home routine

3 Share

Your family and care team receives notifications, insights and updates

Health and well-being.

IntelliCare gathers and securely analyses information about your routine.

You, your family and care team can use the visual information, via the app, to gain insights about your health and well-being.

These insights can be used to adjust your care to help keep you healthy.

Emergency support

IntelliCare's solution includes emergency alerts, such as pendants and panic buttons.

When activated these instantly alert the mobile app or they can be directed to an Australia-based emergency response centre.

Real people, real stories.

"This system gives me reassurance to know that if I have a fall I am being monitored daily. It allows me to stay in my own home in the country for longer, which helps me to stay independent."

— **Mary (mother of Carol)**

"The IntelliCare app gives me peace of mind to know that I am able to check on mum (who lives three hours away) whenever I feel the need. I'm not worrying constantly about how she is going as I am able to check my app. It is very simple to use and a fantastic system to have installed in elderly people's homes, I highly recommend it."

— **Carol (daughter of Mary)**

A smart assisted-living solution.

Discreet sensors

- ✓ **Camera-free**

InteliCare is driven by smart technology - an Artificial Intelligence (AI) engine. It uses a combination of motion, power and open/close sensors to help keep you safe.

Helping you stay healthy

- ✓ **Stay safe.**
- ✓ **Stay on top of your health.**

InteliCare makes it easy for your family or care team to see if how you're doing over time. Super useful for your family or doctor to help you stay healthy.

Also, the app informs your family and care team if a change in routine that could indicate an incident has happened.

Vitals and health metrics

- ✓ **Track and improve health and well-being.**
- ✓ **Compatible with 60+ iHealth, FitBit and Garmin devices.**

InteliCare helps reduce your hospitalisation risks by highlighting ongoing and emerging health issues using automated and manual health metrics. This helps your family and care team adapt your care proactively.

Check in anytime

- ✓ **Immediate information via the phone app.**

InteliCare shares live information with your family and care team via the app. They can check you're OK 27/4.

Includes a pendant

- ✓ **Go out and about safely.**
- ✓ **Press for immediate help.**

The InteliCare kit includes an emergency alert 4G pendant. You can alert your family, care team or an Australia-based emergency response centre if you need immediate help.

Set and forget

- ✓ **No routines to set up.**
- ✓ **No need to carry a smartphone.**

InteliCare works behind the scenes to learn your routine and share the information with your family and care team.

Your decision.

- ✓ **You pick what InteliCare shares.**
- ✓ **You choose who can access it.**

InteliCare allows you to set and adjust how much information is collected and who can see it.

Protect your privacy

- ✓ **An Australian-owned company.**
- ✓ **You own your data.**

InteliCare is Australian owned and operated. We don't ask you to share your data outside Australia.

Independence.
Peace of mind.
